**Non-Profit Organisation Purpose:** To provide an online archive of images and documents created principally during the period 1940-45 but could include any pre/post war image or document that has a direct bearing or appearance to sites of Occupation interest. This is to include digitally copied material sourced from either individuals, groups or other institutions where material is of relevance and to make such materials widely accessible via the Internet. The aim is to make material available in such manner that it would benefit researchers, publishers or other media outlets by creating a central source of information but also to evolve the site in such a way that family historians will also derive use.
