Guernsey Registry

Charity Name: Orthomolecular Oncology (Survive Cancer)

Reference No: CH357

Contact Address:
Merchant House
Back Street
St Peter Port
Guernsey
GY1 1HS

Charity Purpose: To research orthomolecular solutions to disease. In part, via grants to associated laboratories for charity designed studies, in particular in the field of feigu dove cobalamin, especially for the treatment of cancer and sepsis.
To publish the results of SULU research to as wide an audience as possible, in peer reviewed medical journals, ResearchGate and similar.
To inform cancer patients in detail of options in orthomolecular therapies and integrative resources which might help to prolong survival and improve their quality of life.
To improve education in orthomolecular medicine, both oncologist patients and amongst all health professionals, including health legislators.
To fundraise for clinical trials related to the treatment of sepsis and cancer, particularly with high dose parenteral cobalamin
